

eTREX 10, eTREX 20, eTREX 30

The eTrex serie is the first Garmin GPS able to follow the Waas and GLONASS satellites simultaneously. With the GLONASS satellites, the lock of position is 20 % faster in average than with the Waas system. When both systems are used, the receptor uses 24 satellites more.

The new reliable and popular eTrex serie goes even further; rethought ergonomics, a more convivial interface, virtual geocaching and extended cartographic functionalities are among important updates for a GPS that had already entered in the legend.

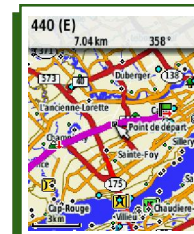

Rugged and waterproof, they are built to resist to dust, humidity and water.

The 20 and 30 models are compatible with TOPO maps, BlueChart g2, City Navigator NT, they also support the Birdeye satellite images.

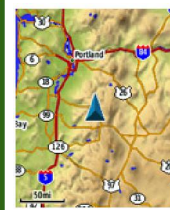

Equipped with a high sensitivity GPS receptor compatible with WAAS and with the prevision system HotFix, they calculate quickly and accurately your position and maintain it even in densely wooded areas.

eTrex 20
190\$*

With detailed maps programs, create your travel destinations and follow your movement

Detailed road, marine and topographic maps including elevations and relief on eTrex 20 and eTrex 30.

The barometric altimeter function included in the S models allows to obtain an accurate elevation profile

Compass function moving on eTrex 10 and eTrex 20 and 30

Specifications

- Batteries life(AA) : 25 hours
- Waterproof IPX7
- High Definition Satellite Definition
- Interface USB
- BaseMap with relief
- 2000 waypoints (1000 eTrex 10)
- 200 routes (50 eTrex 10)
- 200 tracks (100 eTrex 10)
- Accept Point of Interest (POI)
- Weight : 5 oz (141.7 g) with batteries
- Screen 1.4" x 1.7"
- Transflective Screen 65-K Colors TFT
- Transflective monochrome screen eTrex 10
- Resolution 176 x 220 pixels (128 x 160 eTrex 10)
- Dimension 2.1" x 4.0" x 1.3"
- Internal Memory 1.7 GB eTrex 20 and 30
- Possibility to add information on micro SD card
- 20 and 30 Models.
- Unit to unit transfer, electronic compass and barometric altimeter included in the eTrex 30.
